Dear Nancy,

Currently ABM is following our National ABM Green Care Program at all your NFPA facilities in Quincy. The ABM Green Care™ program focuses on products, tools, equipment, processes and policies. Our program promotes a healthier environment for your building's occupants while significantly reducing the harm done to the environment. Green cleaning also preserves your capital investments (floors, furniture, etc.) because green products are less harsh than traditional products. We use environmentally preferable products and sustainable procedures following the requirements of the U.S. Green Building Council, Green Seal, Environmental Protection Agency, Environmental Choice, and the Carpet and Rug Institute, who provide nationally recognized standards for green products and procedures. Our program is overseen by Alan France, our dedicated Sustainability Director. He is supported by LEED APs and Green Associates located throughout the country.

We currently provide you with chemicals selected from the ABM Green Care™ Chemical List, which identifies Green Seal certified products or Environmentally Preferable Products (as determined by the Environmental Protection Agency).

Equipment choices are also a critical component of The ABM Green Care program that is being followed in all of your buildings. Choosing the right equipment not only improves our cleaning effectiveness, it also contributes to the positive environmental impact of your facility. Selecting from our ABM Green Care™ Standard Equipment list helps minimize your costs, improve indoor air quality, maximize the productivity of our workforce and benefits service workers through ergonomic design, reduced sound levels and increased safety.

Microfiber Technology is another important feature of the ABM Green Care™ program. Microfiber cloths, dust sleeves and flat mops improve our efforts both in landfill waste reduction and improved dirt/dust collection.

Nancy if you have any questions and or if you need any additional information regarding the ABM Green Care Program at NFPA please do not hesitate to contact me at any time.

Sincerely,
