

All Conference Center rooms and the 1896 are equipped with internet and wireless connection. Login & passwords must be requested from IS for non NFPA users. NFPA staff can access our wireless network from any NFPA space. Please refer to the [instructions](#).

We have built in projectors in Sprinkler, Alarm and the 1896. [Instructions on how to use them](#) are posted in each room.

The 1896 Center has a screen, ceiling mounted projector, 14 ceiling mounted speakers configured in 2 zones, floor box interface for laptop hookup to projector, and new DVD/VCR and microphone equipment. There is also a wall mounted interface, similar to the ones in PB 3 & 4 for controlling the input and sound.

The meeting space rental prices for non NFPA users include AV.

NFPA meeting space prices
